

## Get in the Know about Green Building

Green building is the hottest trend in the building industry today. How much do you know about it? Would you like to be in the know? If so, TBBA is offering the course “Green Building Made Simple” on Wednesday, April 16, 2008 from 2:30 p.m. to 4:30 p.m.

This course will explain the construction practices of green building, including energy efficiency, indoor air quality, resource efficiency, and material selections. As a graduate of this course, you will learn how to build homes using green building guidelines, about new technologies and advanced construction materials, how to construct homes that use less energy and water, and how to select materials that contribute to improved air quality. This course is approved for 2 continuing education credits by the Construction Industry Licensing Board.

*For more information about this course or to register, please contact Katie Richardson at [Katie@tbba.net](mailto:Katie@tbba.net) or at (813) 873-1000, Ext. 420.*
